

The world with a new world vision

October 27th, 2023

KURODA International Consulting

Takeshi Kuroda

The world is under-covered by any forces of Western camp. And they have their plan called a new world order.

We need a righteous world vision that could seek all agreement of any nation.

From history to the future, we can find all hopes and ideals from history. The world with a new hope may be from all our new actions.

As all above, what I meant is we can dream a world. That is the new reality we propose to all politics.

We have a future that is under all our decisions of today. That must be a necessity of any politics.

I could insist with the most seriously that we have a choice to the world. And that could give us a new world.

We have a choice between the world with a dream and the world without a dream.

And we have an answer that Mr. John. F. Kennedy was a hero who gave us hope and the future.

Politics must lead the world. They may not follow the world.

And we have a question: who gave us the future and the hope? We have to seek all politics.

We see a dream is all from our steps and actions of ours.

We have all reality in the world under all confusion and any bases of themselves. We must have a choice for the world that we can work for.
