

The world with failure and asking for all conflict

KURODA International Consulting

Takeshi Kuroda

We find a new world if the world asks for a truth that means not any pretending but honesty. There must be all failure of all reality in the future.

We find all occurring in the world that is not as we prefer to expect. We can expect all confusion in the coming future.

All common sense falls upon themselves, but the new world insists on the self. We are trying to judge the new world, but who could find an answer?

The eccentric reality is searching for a further future. A great reset is the creation of a new world. We have to ask for all decisions of any politics.

If we could raise a different vision, we could create our realities.

From our office to the world, what can you find with yourself? We tried our vision for the world.

Handling reality is the only permission we should ask for a world.

How could we calculate the world? Western camp, with his justice, tries to seek their world. And who could stand equally to their powers?

Invasion by Russia collapses the world. No nation could judge them under justice.

Out of laws, that is a reality today. Then as we propose a world vision, how does the world react against them?

Our proposal of the righteous world for reality is an opinion. For them, reality has a future.

The future may not stop its steps. We are facing a new world.
