

The world with power game

January 25th, 2025

KURODA International Consulting

Takeshi Kuroda

Power is all reality we have in the world. In any way, we may be unable to escape from all the world's reality.

So, we have a choice to give equal power to the world. And it only permits us to have a future.

We need the progress of our society. People are the basis for our future. So we need to give them a righteous self in a social environment and through education.

The military may be the only decision we make regarding the future. So, we need new diplomacy to face the reality of the world.

We see that we need to shift to the next generation in any field of the nation. All these have new standards of efficiency and productivity.

If we belong to all these power balances of the world, we must lose our independence. This means that our decisions have been stolen in the future.

Victory is only a requirement of ours. We may not take any action unless victory is possible.

We are given any choice, but we need to be wiser than ever. If we fail to make wise choices, we may lose our future.

If we have any concerns about space residents, we may ask for the last diplomatic actions, which is the last opportunity for us to work for the world.

We are at the United Nations' stage; dialogue is necessary for our justice and conscience. We are trying to appear before all peoples of the world.
