

The world without pain and suffering

KURODA International

Takeshi Kuroda

The past is only filled with pain and suffering that the dream of the earth is out of itself. We may dream that the world with its own determines it possibly ask the future.

Politics have a decision with all. That means it comes with all possibilities.

Technology and academic progress may have the correct use for that. We may rim a hand and may seek the future.

That is cooperation and unification of the world as we are standing Ukraine matters. Abandon of wars may be out of suffers that all past is filled up itself.

We may rise ideals and try to seek the same futures.

We may imagine that all people here on earth seek the same future and world.

I am not an idealist but a realist that I am profoundly working myself.
