

Things called the world war 3rd

November 23<sup>rd</sup>, 2024 KURODA International Consulting LLC Takeshi Kuroda

Reality may not wait for us, but it must encompass the world. We must make decisions and choices for the world.

What is in your mind if World War 3<sup>rd</sup> can't be away from it? To move all military forces and make reality be in touch with any progress of all technologies.

All these are following all decisions and plans. Under all these realities, we need our strategy. And which must promise victory and the future.

As we all agree, the liberal camp must rim their hands to ask for their world. All media works for the Langley.

We have to gather all our forces to face all these realities. That is the only possibility we have to face and put ourselves into reality and the future.

We are asking for any alliance and diplomacy under any circumstances, and we have to make all our realities real to prepare us for all their changes.

Then, we can see what the role should be. We have our decision against them.

In reality, that victory is only permission we are given to be forced to be. That means we need equal forces as they are. If you have only a week, what is your decision? We need to make them in a week, that is true.

All these are the fu scale wars, using the highest technology, and we have no cooperation with the universe. We need all our tail of use of all nuclear weapons.

We may know these are the realities of World War 3, and we have to be prepared for them and share them with the world. One idea is, if we can ask diplomacy under all these circumstances, what the world's decision will be.
