Takeshi Kuroda

They must be homeless, and They are people without a homeland. They are the only tool who is forced to be killed.

International society must make all consequences to all these truths.

As we insisted, politics must serve an equal life environment for everyone. These could be the new consensus of the new world of the future.

We find all tragedy in history. But we have to know we have a choice in the future. That is the world we have in the future.

This is a possibility all politics have themselves with. That is only where we can find the world as the future.

But one truth for all is that we have a new world order. Is there any escaping from these circumstances? That is the world we have today.

With any calculations with humanity, What is a decision in the Gaza Strip? So, the Asian Union should invite them into our alliance, seek a new society, and ask for Diplomacy to ask for a solution and peace.

In this context, the Asian Unity advocates neutrality and non-war and would like to propose a shared sense of world unity.

In the Gaza Strip, we only find a hatred. But for truth, hate may not find any solution to the reality.

We may rim a hand with a dream and hopes. That could cause us our future. Hope is the only direction we may follow.
