

To decide the world

KURODA International Consulting

Takeshi Kuroda

We would find the last moment of the world. Waited by World War 3rd may not be denied.
We need our decision.

We may find Armageddon, but we may not follow any mind control from the CIA office.

This is the last decision from our office to the world. We would cooperate with entities from space and ask for all solutions of the world.

We need a future. That is all reason we are trying to work for.

Any politics may be gathered with all effect, and we are trying to work together in the future.

We may find any contact at the moon by the UN and Roswell 13 from the USA.

If, In a formal diplomatic note, I propose that, when given contact with the United Nations lunar base, we implement all recommendations from our office and seek a new world.

We have equal possibilities for the future as we may gain all probability to the realities.

And these formal diplomatic mandates are our possible reality, and proposing a dialogue with the existence of the future is asking for the challenge of a new world.
