

To face a decision

February 5th, 2026

KURODA International Consulting LLC

Takeshi Kuroda

We have all reality of the world which can only be found through any information from Langley. But if we seek the future, we are forced to make our decisions.

We have only an idea that we need an equal basis by any comparison of realities. And these are the only possibilities we may find a way to the future.

So we need dialogue to seek any realities, and its basis may give a way to face any reality of the world.

The world must be covered by its darkness. On the other hand, we may find our realities that may rim its hands.

These are less than any imagination of ours, but only a choice we have in a world today.

We are not seeking Armageddon but our survival. And the future may not be given to us, but we need to be eager to find our world itself.

We have to gather under hopes, and it must be a reality and agreement of ours. And these are how we can reach the future and recreate the world.

Above are our choices that only permit us into the future. Instead of all we have any reality we have with a world.

So decision is a way that only permits us into the future.

But we can see if it comes, we may find some dreams for the future. And these are how we may cooperate and be gathered under the same ideas.

And we can say these are our letters to all politicians.
