

To participate under the 3rd party.

KURODA International Consulting

Takeshi Kuroda

The world is divided under the western camp and Russian and Chinese alliance, One with an Anglo-Saxon mission and one with evils. We are trying with the 3rd party to raise new ideas and philosophies.

Equality is a requirement for facing the world as we see that we need the same environment in any field of our realities.

Asian union must follow that reality in 3rd party. That permits us to stand equal to the world.

And we need the vision to be shared by all nations of the world. That must be a challenge for us to propose the new world.

There is western justice as democracy, but we may not follow any racism. That must remark we are proposing our vision to the world.

We may not ask for any conflict but cooperation. If we could share peace, we would cooperate in the same world and the future.

If World War 3rd is all prepared, we could face and put in under all those bases.

That could cause all changes in the world. All beings are willing to put themselves into all those realities from space. As in Africa and South America, they could ask for their decisions.

We can propose a new world framework if the United Nations is a perfect puppet. This is from all contact from our office to all reality we have today.
