

To serve under political responsibility.

Kuroda International

Takeshi Kuroda

Politics takes all duty to serve the lives of all people. This agreement is all bases on politics. The modernized and high trend of lives is guaranteed under politics. The regional government gives social learning to adjust self. Basic income must ensure all survival and ask duty of laborers. This is a part which is required from a nation under lobar ticket. This permits any industry for the same ticket of labor.

This is new socialism that contained further technological use. Society 5.0 and the next society are realized under political decisions.

These realities are included with all participation and cooperation with the universe. These must be planned under politics and asking for its action.

All expansion of possibility is the trend of the world today under any revolutionary changes. Politics guarantee the participation of all people. This is compliance of politics to ask a new world.

We may find the right idea that a new world and future possibilities exist under reality today. I mentioned in all letters that politics could make them with reality, not with dreams.

This is a time today we are dreaming of the future.
