

Truth and reality of the world

KURODA International

Takeshi Kuroda

There is a plan tail of the world. Coming the future, we have all difficulty with reality.

Economic crisis and wars come with a reality that politics must take action and, more than all, consider handling it.

Its information must-know details. Politics has the running nation and foreign affair to make own reality for handling to face the world.

Gaining that wealth and economy must be planned, and the army must equally face reality.

Politics must take all responsibility to people. The decision gives reality that is a hobit of kings.

There is a world to save the world. In history, how many heroes do we have?

We dare truth to dream and seek purpose. God must answer its voice.
