LLC and Foundation

Under all circumstances today, to be in touch with the future.

November 1st, 2023

Kuroda International Consulting

Takeshi Kuroda

We may dream of a new world with all new technology. We have a choice to seek for our nation in a new future.

We need to have a consensus that all these are created by the free economic system with a new world and realities.

We have an idea that industries have a future. That means politics may make his action in economic policy.

These are the new designs of our nation. And we have the right step with our diplomacy.

New space technology and military technology are related to industries. And we need a new economic system under our consideration.

We have a complete choice to create our future at any reality of its creation of the nation. We are permitted to ask for our dreams.

Political decisions and plans could make new realities in the future. That means they are the kings.

The new national design of every competent bureaucracy is the creation of the reality of the future.

To see all eyes of children, we have the correct answer.

The future may not be decided, even a reality of themselves. But we have a decision for the future that could cause us new realities.
