

Under any calculation of the reality and the choice

Kuroda International Consulting

Takeshi Kuroda

If we face the world's reality, what can we find within? The new world order is only a reality of the world. That is what we have to know.

Then we have a choice for the future. What is your decision? That is what I am asking.

The only possibility we have is standing equally to NATO in any reality of its bases and self.

We see any organization and environment of reality as economy and development, military, space technology, strategy, and secret police. This is the reality it holds in any climate of the world. That is why we must work according to all those realities but any media.

How could we equally face the world? We need the same environment in any comparison.

Only a step we are permitted in the world is facing all realities without failure of self. That means we need to make the right decision.

Now we have all progress of any realities that expect us with our new future.

How do we handle all realities? We had had an all wises in history. We have to ask them for a solution.

If we have our world vision, how could the world be reflected against us? And if we may find a future, what is an idea?

The power game is all reality we have in world politics. That forces us to have a proper understanding. That is the only way we may step into the world.

We see equal power as any environment gives us e equal steps into the world. We see all new technologies in the military as any field of reality. And we need a future to build our nation.

Wise always makes correct decisions, and he has a future.
