

Under moving all military and asking for the construction of a new reality

Office
of
Kuroda International Consulting
Takeshi Kuroda

We have sent all proposals that are ideas for a new world. But in all reality, we put ourselves within. We need to move all military to realize the new world.

This is the only permission we seek for a new world.

Power politics is only a reality we may put ourselves in. That is a law we have to follow.

So the idea we send that is raised on the top, we follow justice by military how we may gather the world instead of invasion Taiwan.

This is a difference of choice that may ask for a different reality and future world.

We may bet a coin on victory, but who tells the result? That is what we have to work for, and more than eager to settle new realities.

Idea and justice are from our office that justifies deploying troops. Even we may realize the world under our decision.

There is always a need to stake oneself in getting the future.

I will give you the truth. Those who run away only fail and do not those who gain.
