

Unification and ideals

December 28th, 2024

KURODA International Consulting LLC

Takeshi Kuroda

To unify Asia and seek any ideal of humanity in a region. Recreate the area and build a new society with new systems and technologies.

These are full agreements and new consensus of the region as we have all tragedy in the Gaza strip and the Middle East.

We are trying to avoid conflict and war, which means we are throwing away all troubles in favor of unification and sharing new ideals.

We must agree that we are not seeking tears anymore. We may know that we have found all reality in the Middle East and are trying to give all children a new future.

These could be a consensus of all regional politics, and then we may ask for a new presence in the world that is out of conflict but shares all new hopes.

As we may know, these are the agreements of conscience, which are the tails of our diplomacy.

We all know how we hold the world with its truth and plans, but we have all our challenges to the world.

Wars in history contain all tragedy, so we are away from it and seeking our ideal with a new society and life.

Politics makes everything possible, so we propose a new world to a region. And we know who has decided on it.

We have a new conversation with a world under our conscience, and we may find the same idea familiar in the West.

These are the further we can try with a world under the reaction of it.
