

Unification of Asia

KURODA International Consulting

Takeshi Kuroda

Equal life conditions for all people. This agreement is all our proposal for the unification of Asia.

The same standardization could share new social and military standards as all space technology and participation.

Rebuild any social reality under new technology and systems. Politics need to share the same consensus and make a new future.

Diplomacy could be given under full cooperation and make a presence worldwide.

All academics and education must be for all progress to recreate any realities using academics.

We are asking for any agreement to unify the region.

Under any agreement of all representatives of nations, we could declare and make realities.

Based on our roots, unification could realize new possibilities.

All these bases could make it possible for us to face any realities of the world. And we need our world visions to cause all concern with the world.

We have our choice for the world. We are trying to make our independence to create our future.

A new relationship with the world comes under independence and our vision and ideas. And we are trying to make all our realities.

We all have decisions that must be common to make new steps into the world. Not any conflict but the unification of ourselves.
