

Unification of the whole of Asia

KURODA International Consulting

Takeshi Kuroda

We need a consensus to take full responsibility for the world and the future. We know that all reality is under any crime.

We are trying to make a new technological civilization under all contact with the universe. We need a base to participate in the universe.

All standardized systems are shared in all regions, and the military must be under control with command.

All these are the bases to step into the future. All industries must own by domestic capital.

We are trying to cover the whole world under our justice. We are trying to build new civilizations under new technology and systems.

How could we reach a future under any realities of the world? We need to determine our minds.

Humanity and laws must be all decisions of the world. We could judge any reality by those.

We are trying to unify the whole world under our justice. But you may call them not fools, but we see all the reality we have in the world.

Any reality is under all criminal matters. That is all reason we are trying to judge under laws and justice.

We could dream of a world and the future. That means we need our decisions.
