

United Nations General Assembly

August 29th, 2024

KURODA International Consulting

Takeshi Kuroda

To make any confession and disclose all the world's truth under open conference, we need to propose our world visions.

These are the creation of a new world with new rules. They are based on any nation's agreement, as we have the most votes.

All these are not under the presence of the Western camp but should be shared equally with any nation and race, even with all nationalities.

These proposals are about creating a new world and recreating it as we face any reality. We need a new, adaptable philosophy that can stand against any reality.

To ask for all responsibility for the world, we may share all agreements and actions by any nations with the same world visions to seek for the future.

We have wars and conflicts in history and reality, but if we can stop all these realities under the agreement and make a new consensus, what should be the world's decision?

We may have a choice for the future. We have all the possibilities to recreate the world through decision and agreement. The United Nations General Assembly may allow us to seek a new future.

As we describe any world vision and ideas seeking a new world, these are our proposals to you all.

Even if we are facing any crisis of reality as it may be planned, we need to take all our actions for the future.

King always has a decision about the world, as we are trying to propose to the world with any ideas.
