

We will carry out a full-scale confrontation regarding political, economic, and military power.

KURODA International Consulting

Takeshi Kuroda

This is the means of completely dividing reality and confronting it.

We set the division of this absolute reality in the world. After all circumstances, we related with all space, waiting for changes and working for the future.

World war 3rd is under all plans. We may not be away from it.

Under all new contact with space, we could try a new world. We can find that there are all realities on the base of the world. But any possibility that we could seek any cooperation, that we could find hope.

If all peoples know all truth about the world, we have even revolution that we can find in the world.

All divided world that we rise all justice and we may seek a world under our visions.

All these are possible under military, political, and economic powers.

If all these are given to the world, we could find a change as we can work for any effort of all ours.

As unification of the whole of Asia could be based on all new realities.

But we have to know what they have. That is the reality we have to face. Then we must be wise to step into the world.

You must enter the tiger's cave to catch its cub. We cannot be slaves.
