

With a birth rate to consider right living environment

Kuroda International Foundation

Takeshi Kuroda

As life living environment from France as we may find 2.0 birth rate. That is right considering of society and lives.

All human requires right environment and social system to continue themselves. Reconstruction of self that is with next society must be based upon all environments.

Human need own survive that is built rightly with society to be under politics. These bases are growth with society 5.0 that is all convenience to futures.

All these are right stress and deeply understand all necessity of human beings.

We must see that this is as same as animals. Because tough stress may not give 2.0 of birth rate.

This is a French style of living but humanity bases and self require as such with own realities.

These are perfect proof that human require not to be jailed but right living environment not as MATRIX.
