

KURIDA INTERNATIONAL

With an entire conversation with conscience of the west

KURODA International Consulting

Takeshi Kuroda

With all decisions of the world and the future, we are trying to converse with the conscience of the West.

The world is under-planned, but we are trying to share reality under the possibility.

Asian union may equally ask for its conversation. These are the decision of the world as the future.

These are offered as honest dialogues of intellect and conscience since these are the world's decision that is only permitted by.

And we have all contact with the universe and could offer to share them in shared reality in the future.

On the other hand, all these are sharing any possibility to the world and the future. These are the reality. We know what the West has done in the past.

And we can find both, and we may see its ideal. The future may accept both.

The rest of the necessity goes by the world and future design. We are trying to make new rules and realities.

Above, we may ask for its agreement with the world in the future.

We may ask for the world with its fairness. The world could follow them out of disagreement.
