With science to rebuild realities

Kuroda International Foundation

Takeshi Kuroda

New ages with a new science that possibly serve the new world. All academics as university and all commissions have new creation with the world.

That is reason why the world has a new environment with technology and systems.

Politics must ask himself with reconstruct all academic environments. All education and basic research must be reached the highest condition and more.

Waiting for space ages that all new world is not an illusion. That all possibilities are expanded to the futures.

Science of any progress is as same as all academics that these are new creation of futures. So politics need to understand all reality is moving next to science. That is any proof we can rely on and that is a proof we need to work for that.

That is reason new society with all new information environment must be planed under politics. All academics are full of necessity that we may seek the futures.

Basic research is a born to any progress. That we need all educational environment and academics with university.

Above is an answer that we are working for the futures. Politics must determine to change all realities.

Futures under competition principle may not wait for you.
