

The change

October 30th, 2023

Kuroda International Consulting

Takeshi Kuroda

The world is under change, but we could see all collapse may end the world.

Conversely, there are elites that numbered 14,400 people who may control the future. They would seek their world and the future.

Any conflict and competition must be summarized to the new world. Western camp with Anglo Saxon mission and Israel must seek for their rule and laws.

The reality of the Gaza Strip is not someone else's problem for us.

And following 6000 million elites must appear themselves to the world. This must be a new world governance under the United Nations with the Unification of the world.

These are not far futures, but all these realities could be given in a month.

As we must know, all these changes are the creation of their world. That means we are not served any choices but only permitted to follow any realities.

We have all power games in history, and they are trying to end themselves.

Under all new circumstances, do we find any possibility of our future?

These are the reality of the world that we have to know. We may not be a dreamer, but we must know reality.

We need a future even under all these circumstances. We are forced to make all our choices.
