

the choice of dialogue

KURODA International Consulting

Takeshi Kuroda

The decision of the world could be from dialogue with any nation of the world.

What I want you to know is that we are trying to share the ideals and the same future.

This new world creation combines unification and a new design of the future. We have a new era to step into all new possibilities with technology and expand our stage to the universe.

The dialogue could reach an agreement. I insist that the whole deal could create a new world for any nation.

The way of itself is by a dialogue. Never spend ourselves with the military.

If we could mediate all the world's problems and conflicts, we would like to present all proposals from our office as proposals for the new reality of dialogue.

Through dialogue, we could hand a decision that gives us all new designs by bureaucrats from any nation.

These are the new creation of the world as we have all revolutionary changes today.

War cannot give the solution. Dialogue always makes a solution possible.

This is a ticket to the new world and the future as we send invitations to any nations with their representatives.

We give a challenge to the world. We need a future out of any doubt. We have to be a wise and must make a right choice.
